

## INTRODUCTION

Artos is a digital asset of PT. Artos Digital Sejahtera which was established in 2022 in Indonesia.

Artos is a DeFi token that is backed by the community to form a strong foundation, developed with the Binance Smart Chain (BSC) network which is a means to leverage solidity-based smart contracts with speed and efficiency that is far better than others.

## TOKEN NETWORK

Artos chose the Binance Smart Chain Main Network as a means to leverage solidity-based smart contracts with far greater speed and efficiency than other networks.

BSC itself has become one of the most widely used blockchains for decentralized finance (DeFi), BSC uses a token protocol developed by the Binance Team called BEP-20 which is known for its block speed of 5 seconds which is much faster than blocks on other networks on average. speed 1 to 2 minutes.

## ABSTRACT

We Build Platform Based on Real Experience and Observation. Artos is a Community focused DeFi Token.

Armed with experience in the crypto world, observation and a strong determination to create a platform that can be used by all groups as a tool to facilitate transactions and business, Artos was created as a bridge for that purpose.

We believe in the sharing economy and decentralization, which is why we will develop and create the next generation of tools and platforms for miners and digital asset trading.

The uniqueness of Artos token lies in the transaction system that provides automatic reflection to each holder so that holders have the opportunity to get automatic rewards for each token they store in the wallet, besides that Artos has a Wallet dapp application that is integrated into their Main Wallet such as Trust Wallet, Metamask , or Safepal so that holders can perform transactions, swaps, exchanges and automated staking.

## TOKEN DETAILS

Ticker : ARTOS  
Network : Binance Smart Chain  
Decimal : 4  
Max Supply : 100,000,000,000 ARTOS

## SMART CONTRACT
